Infection Control and Dental Practice Act

Sold out

INFECTION CONTROL

A **Dental Infection Control** course provides comprehensive training on **preventing the transmission** of infectious diseases in a dental practice. It covers proper **hand hygiene**, **sterilization techniques**, **personal protective equipment (PPE)** use, **waste management**, and the **chain of infection**, all aimed at protecting patients and dental healthcare workers. Learning objectives include identifying common pathogens, applying standard precautions, correctly cleaning and disinfecting instruments, and adhering to relevant regulatory guidelines.

DENTAL PRACTICE ACT

A **Dental Practice Act** course provides an overview of **legal regulations** governing dental practice within a specific jurisdiction. It covers the **scope of practice** for dentists and auxiliaries, supervision guidelines, mandatory reporting, prescription drug laws, ethics, and consequences of violations. The course equips dental professionals to **practice safely and legally within state regulations**. Learning objectives include **understanding team roles**, identifying governing agencies, interpreting supervision requirements, and applying laws on practice standards and license renewal.

Our Goals...

- Understand the **impact of healthcare-associated infections** in dental settings.
- **Identify, manage, and prevent** infectious diseases, including bloodborne pathogens.
- **Apply infection control strategies** based on the chain of infection.
- Adhere to scientifically accepted **infection control practices**.
- Properly use **cleaning, disinfection, and sterilization protocols**.
- Implement controls to **reduce exposure** to infectious materials.

Presenter

Dr. Danny Kim is a board-certified oral & maxillofacial surgeon. Born in South Korea, he spent the majority of his childhood moving between South Korea and Southern California, which provided him the unique opportunity to be bilingual. He attended the **University of the Pacific** where he completed the 3+3 Pre-dental accelerated program and received both his bachelor's and DDS degree. Upon completing dental school, he fulfilled a one-year internship at **Parkland Memorial Hospital** in Dallas, Texas. Dr. Kim then completed his Oral and Maxillofacial Surgery Residency at **Broward Health Medical Center/Nova Southeastern University** located in Fort Lauderdale, FL.
